HOLLYWOOD , CA Los Angeles Art Association Gallery 825 is pleased to present an immersive sculptural installation by Los Angeles artist: [SEDA SAAR](#) in its Wurderman Gallery. Saar's investigation into the nature of perception is distilled by the artist's subject of spatial environment as a phenomena of real and imagined forms. Saar materializes this as dialog between an object and its representation using mirrored and transparent surfaces that bring attention to both its physicality and multiplying forms created by its reflection. Saar gives the viewer a central role as their images are reflected back in each piece, implicated within a framework of society, architecture, nature and technology. Saar's work belongs to the lineage of Southern California's Light and Space Movement that began in the 1960's and rode a wave of interest in the perceptual and phenomenological effects of color and material.
